

# INDUSTRIAL SOLUTIONS GROUP

## Introduction

The Industrial Solutions Group has a wide variety of experience with many varying technologies. This group is dedicated to providing control systems and application specific solutions for the Automotive, Corrugated, Food and Beverage, Packaging, Steel, Power and many other industries, specializing in PLC and PC based Control systems. Balancing the latest technology with rapid development and deployment, the Industrial Solutions Group can provide a wide range of systems that drive, monitor, adjust, and support manufacturing operations, all directed by your business environment.

## About Industrial Control Services

Experienced with Allen-Bradley, Siemens/TI, Square D/Modicon, GE, Mitsubishi, Omron and other PLC's. Drive Systems include Indramat, Siemens, Allen Bradley, etc. HMI programs include RSView, Intellution, Cimplicity, Factory Link, Iconics, and Citect. We are a comprehensive source for your automation control system needs from upgrades, retrofits, to new systems. Our experience includes stand alone controls and plant wide networks, including Ethernet, Profibus, etc. Our staff can help you specify, design, program, build, start-up and document your automation control system project. The latest in design technology tools and a UL approved panel assembly shop assures our clients of superior results.
